AYGF SELECTED AS THIRD-PARTY MONITORS FOR FEDERAL CARES SUPPORT UNIT

We are thrilled to announce that the African Youth Growth Foundation (AYGF) has been awarded a contract as a third-party monitor by the NG-CARES organisation. On June 15, 2023, our NGO was chosen to undertake two rounds of monitoring exercises in Ekiti, Ondo, and Osun states over the course of one year. This contract was granted to AYGF based on our proven expertise and commitment to ensuring transparency and accountability in developmental initiatives.

The Federal CARES (COVID-19 Action Recovery and Economic Stimulus) Support Unit recognised the vital role of third-party monitors in evaluating and reporting on the progress and impact of their programmes. AYGF's selection as a trusted partner reflects our solid track record in effectively assessing project implementation and providing reliable insights.

As third-party monitors, our responsibilities encompass conducting comprehensive assessments, data collection, and analysis. We will closely collaborate with the Federal CARES Support Unit to evaluate the effectiveness and efficiency of their interventions aimed at mitigating the socio-economic impact of the COVID-19 pandemic in the selected states. Our findings and recommendations will contribute to informed decision-making, ensuring that resources are optimally utilised and outcomes are aligned with the desired objectives.

This contract award is a testament to the AYGF's unwavering commitment to promoting good governance, accountability, and sustainable development. Our team of highly skilled professionals, equipped with the necessary technical expertise and knowledge, is prepared to carry out these monitoring exercises with utmost diligence and integrity.

We express our gratitude to the NG-CARES organisation for entrusting us with this crucial role. This collaboration presents an excellent opportunity for AYGf to further contribute to the socio-economic development of Ekiti, Ondo, and Osun states. We remain dedicated to upholding the highest standards of professionalism and ensuring that the monitoring exercises are conducted in line with international best practises.

We look forward to the positive impact that our partnership with the Federal CARES Support Unit will bring about. Stay tuned for further updates on our monitoring activities and the progress we make in advancing transparency and accountability in development projects.
